

02.03.2009

Thermote & Vanhalst NV is official importer of Aichi aerial platforms.

Since January 1st last Thermote & Vanhalst NV has become the official importer of the Japanese quality make Aichi. As from now the specialist in full service for lift trucks, spare parts, accessories, rental, repairs and handling equipment, will also be responsible for the distribution of Aichi on the Belgian, Luxembourg and French market.

The Japanese Aichi was established in 1962. The make had until recently been known mainly as a manufacturer of tracked aerial platforms. The range however was expanded with electric scissor lifts and diesel-powered aerial platforms on tyres. A constant in the Aichi range is the high level of quality of all machines. The company is therefore considered as the trend-setting market leader on the Japanese domestic market.

In addition to this recent acquisition in the range, Thermote & Vanhalst – part of TVH – Group Thermote & Vanhalst – is also the official importer for the makes Doosan, Icem, Lafis, Thervan, Dino Lift and Dambach.
